

Heart Sun Catchers

Create a heart shaped sun catcher to hang in your window during the summer months. As a bonus, repurpose an old plastic container to show love towards the planet.

What you will need:

- Sheet from a plastic food container, washed
- Sharpies
- Scissors
- Tape

What to do:

- Trace the shape of a heart onto your piece of plastic and cut it out. You may need help from a grownup to cut your sheet of plastic
- Decorate your suncatcher using sharpies. If you want to use multiple colors next to each other, make sure to flip the plastic over to color your designs so the colors don't smear
- After you've finished decorating your suncatcher, tape it to your window and watch the sun shine through it
