

# DIY Shofar

A shofar is a trumpet that is made from a ram's horn. It is sounded multiple times on Rosh Hashanah, the Jewish New Year. Create your own version of a shofar using construction paper.

## What you will need:

- Construction Paper
- Paper plate
- Tape or glue
- Craft supplies such as markers, sharpies, and ribbon
- Yarn

## What to do:

- Roll your paper plate into a cone shape and secure it with tape
- Use glue or tape to attach your construction paper around your cone shape. This will be your horn
- Use your craft supplies to decorate your horn
- Create a handle by running a piece of yarn through the inside of your horn. Tie the ends together to secure
- Learn about the different shofar blasts in this video [here](#).
